BULK SMS & VOICE

Bulk SMS & Voice Campaigns

বাল্ক এসএমএস ও ভয়েস এসএমএস

A self-service platform to send Bangla and English text SMS and recorded voice messages to thousands of numbers, with contact groups, scheduling, delivery reports and an API for software integration.

Text + Voice	Bangla	API	Live
Two channels	Unicode SMS	For developers	Delivery reports

The Challenge

Schools, businesses and political or social campaigns need to reach large audiences quickly, including people who cannot read text messages. Sending manually is impossible, and many tools give no delivery reports or Bangla support.

Our Solution

A campaign platform with masking and non-masking text SMS, voice SMS with recorded audio, contact groups from Excel upload, scheduled and personalised messages, balance and recharge, delivery reports, and a simple HTTP API so other software (like our EMS) can send OTP, due and result SMS automatically.

The Result

Customers send a campaign to an entire contact list in minutes, reach non-readers through voice calls, track delivery per number and connect their own software for automatic alerts.

Key features

✓ Text SMS
Masking and non-masking, Bangla and English, personalised with names.

✓ Voice SMS
Upload or record an audio message and broadcast it as a phone call.

✓ Contact groups
Import numbers from Excel/CSV and organise them into groups.

✓ Scheduling
Send now or schedule campaigns for a set date and time.

✓ Reports & balance
Delivery status per number, campaign history, balance and recharge.

✓ Developer API
Send OTP, alerts and notifications from any website or software.

Who is it for?

- Schools, madrasas and colleges
- Retail shops and brands
- NGOs and campaigns
- Software companies needing OTP / alerts

Industry: Marketing & Communication

Technology & integrations

SMS Gateway API · Voice Broadcast (IVR) · Contact Groups · Scheduling · Delivery Reports · HTTP API
