SOFTWARE DEVELOPMENT

POS & Inventory Management

পিওএস ও ইনভেন্টরি ম্যানেজমেন্ট

Point-of-sale and inventory software for shops, super shops and wholesalers: barcode billing, purchase and stock, customer dues, suppliers, multiple branches and profit reports.

Barcode — Fast billing

Multi — Branch & warehouse

Baki — Due tracking + SMS

Profit — Daily reports

The Challenge

Shop owners lose money to stock mismatches, unrecorded credit sales and slow billing at the counter. Without proper records they cannot tell which products make a profit or how much each customer and supplier owes.

Our Solution

A fast POS with barcode scanning and thermal receipts, purchase and supplier management, live stock across branches and warehouses, customer credit (baki) tracking with SMS reminders, returns, expenses and profit/loss reports.

The Result

Billing at the counter is quick and accurate, stock is always up to date, dues from customers and to suppliers are clear, and the owner can see daily sales and profit from anywhere.

Key features

✓ Point of sale
Barcode billing, discounts, multiple payment methods and thermal receipts.

✓ Inventory
Live stock, low-stock alerts, stock transfer and adjustment.

✓ Purchase & suppliers
Purchase orders, supplier dues and payment history.

✓ Customers & dues
Customer accounts, credit (baki) limits and SMS due reminders.

✓ Multi-branch
Separate branches and warehouses with central reporting.

✓ Reports
Sales, purchase, stock, expense and profit/loss reports, exportable to Excel.

Who is it for?

- Super shops and grocery stores
- Pharmacies
- Electronics and hardware shops
- Wholesalers and distributors

Industry: Retail & Wholesale

Technology & integrations

Laravel · MySQL · Barcode Scanner & Printer · Thermal Receipt Printing · Multi-branch
